Quality of the Microfiche Reproduction

Micromedia Limited maintains the highest standards for micrographic reproduction. Attempts are made to obtain the best quality print version to microfilm. However, there are some printing styles, colours and graphic layout styles (including maps, graphs and tables) which do not reproduce well. Because of the value of the original document, Micromedia has filmed it recognizing that it may not be as easy to read as the original document.

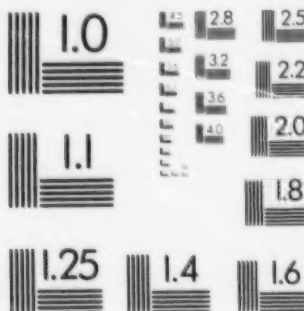

Some pages have been filmed twice to improve the clarity of the reproduction. Consult both reproductions to ensure that all of the original text is read.

Executive Summary

Student data for the five-year period, 1996-97 to 2000-01, is available for all programs offered at the Saskatchewan Institute of Applied Science and Technology (SIAST). The data is collected and recorded by the Institute's student record system (BANNER). The data is extracted annually from the record system in preparation for a variety of studies and primarily for the SIAST Education Equity Monitoring report submitted to the Saskatchewan Human Rights Commission. The data for the five-year program summary herein is verified with that of the Education Equity Monitoring report.

The Five-Year Summary report is produced annually. The report is a comprehensive picture of students registered in SIAST programs and this year has been expanded to include:

- a) Core Funded Programs
 - *applied certificate, certificate, advanced certificate, and diploma programs*
 - *on-campus programs*
 - *full-time and part-time programs*
- b) Non-core Funded Programs
 - *applied certificate, certificate, advanced certificate, and diploma programs*
 - *off-campus programs [which include those offered in partnership with Regional Colleges or other agencies; distance delivery, SCN, and home-study]*
 - *full-time and part-time programs*
- c) Apprenticeship Programs
- d) Basic Education Programs
- e) Job Start/Future Skills Programs

The report identifies capacities, applications, enrollments and graduates for SIAST programs.

Capacities

The capacities data is provided by the Registrar's Office and includes only the on-campus programs at the four campuses.

Applications

Applications identified in a specific academic year (July to June) are not the same cohort as the enrollment figures identified in the same academic year. The application data record those that applied to SIAST within an academic year.

Application data are not recorded in BANNER for the Apprenticeship and Basic Education programs.

Also, the majority of applications for off-campus programs are not entered in BANNER. Therefore, the applications data are mainly for those programs offered at the four SIAST campus locations.

For those programs with two exit points, both certificate and diploma, students must re-apply to enter the diploma program. An example is the Early Childhood Education certificate and diploma programs.

Enrollments

Enrollments for all SIAST programs are recorded in BANNER. Total enrollments for each of the five years are much more than applications, since applications for Basic Education, Apprenticeship and many off-campus programs are not recorded in BANNER.

SIAST enrollment in programs for the period 1996-97 to 2000-01 can be summarized as follows:

<i>Program Enrollment</i>	<i>1996-97</i>	<i>1997-98</i>	<i>1998-99</i>	<i>1999-00</i>	<i>2000-01</i>
SIAST Credential Programs (total)	7743	8041	7174	7181	7380
<i>Core Funded</i>	5342	5333	5163	5355	5528
<i>Non-Core Funded (extension)</i>	2401	2708	2011	1826	1852
Apprenticeship Programs	2169	2597	2782	2883	2854
Basic Education Programs	3674	2992	2882	2567	2493
SIAST Programs (total)	13586	13630	12838	12631	12727

Graduates

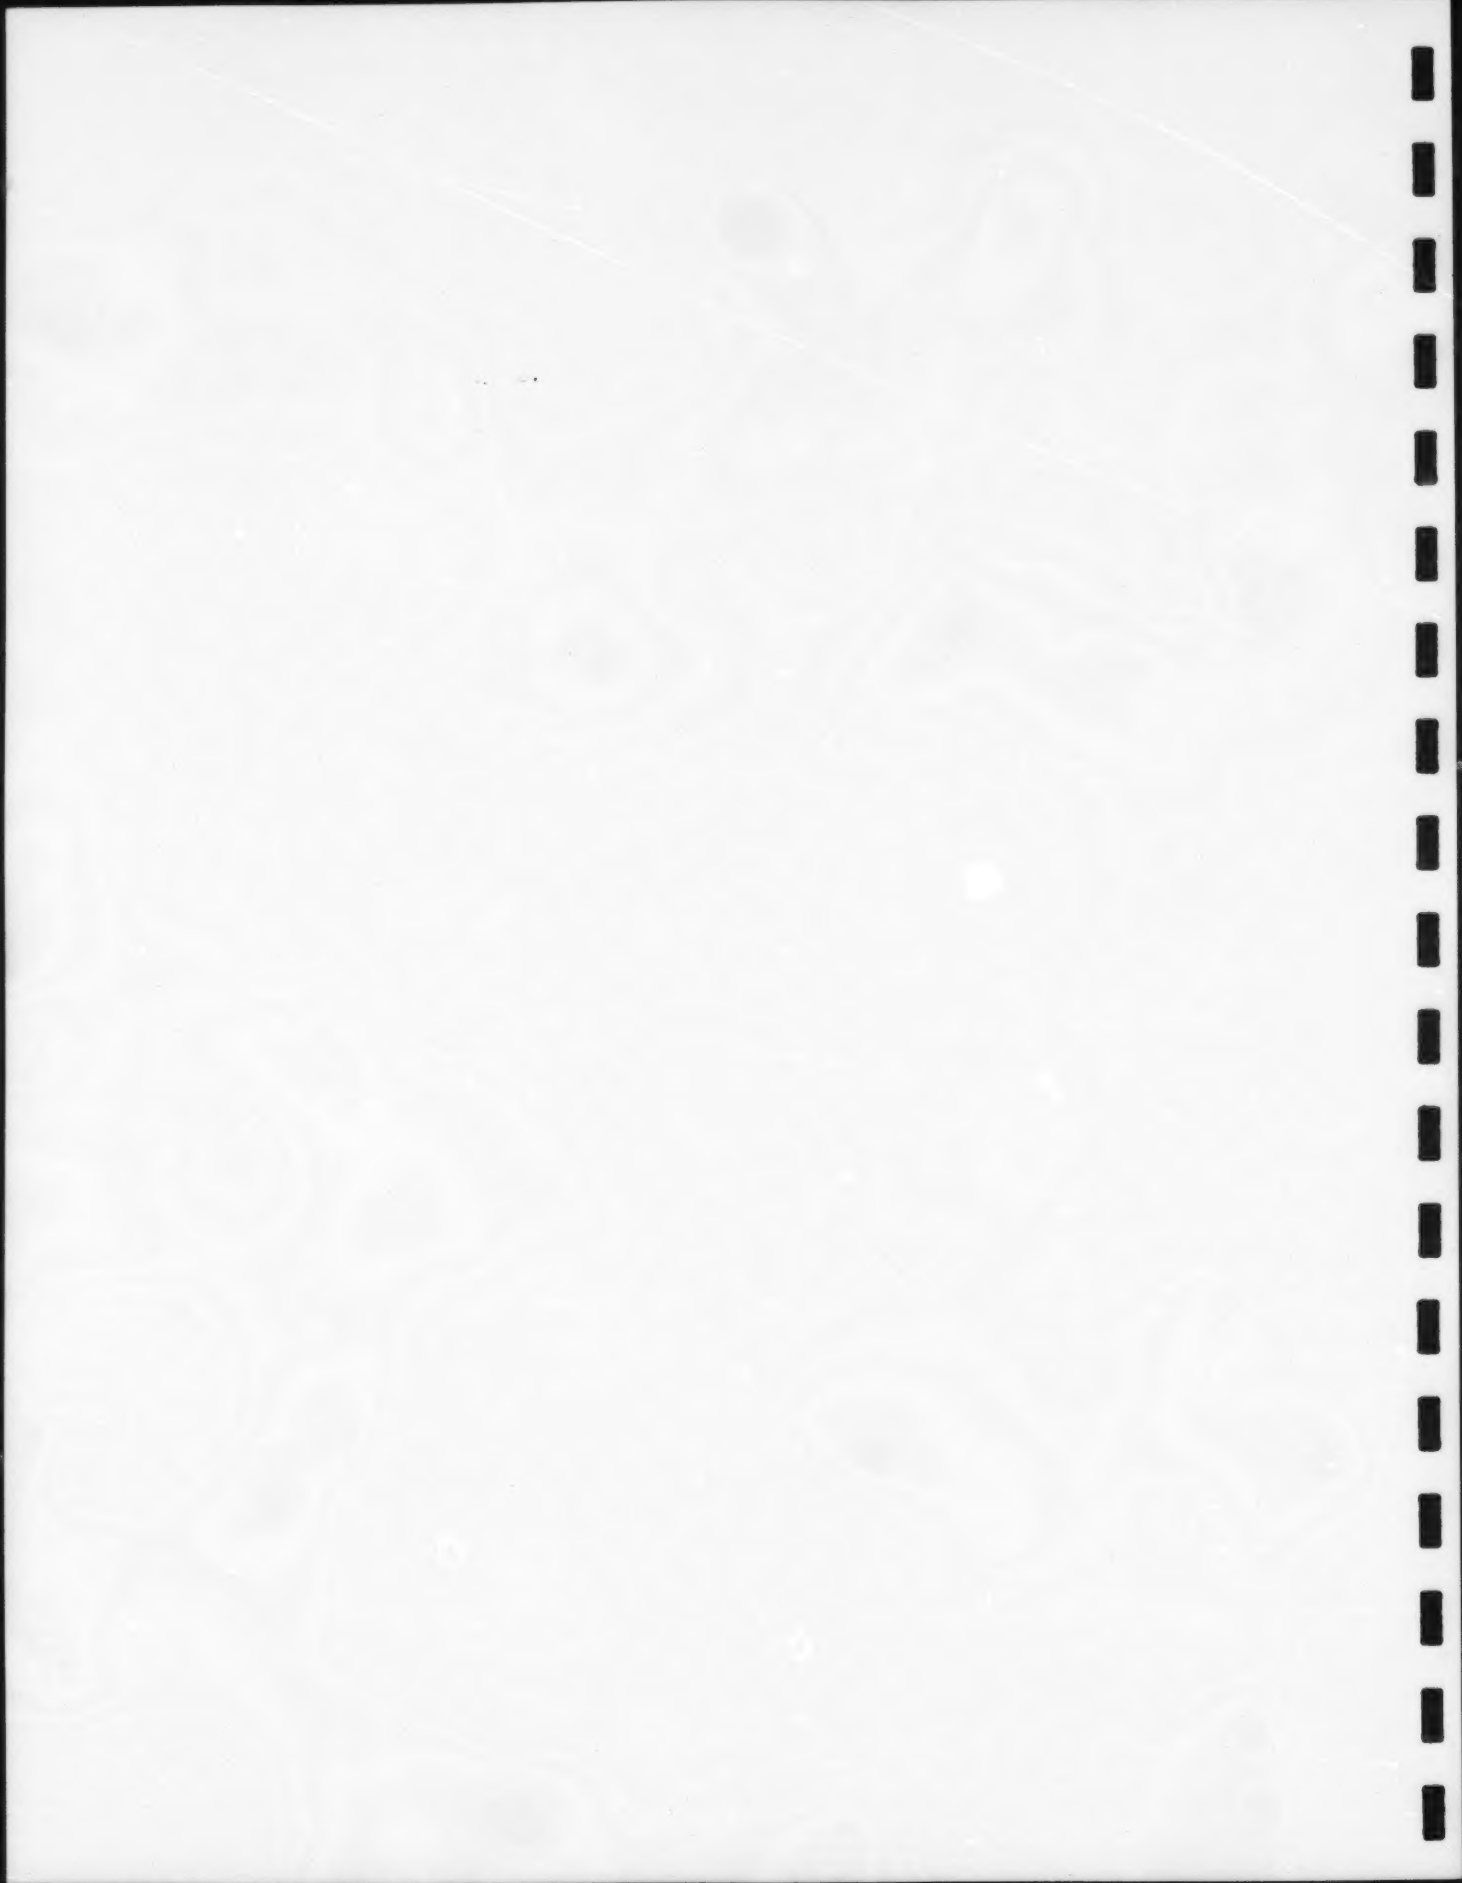

The graduate data are for programs for which a SIAST credential is awarded. As with applications, graduate data does not include Basic Education nor Apprenticeship programs. SIAST graduate data, according to the figures used for the Education Equity Monitoring Report, for the period 1996-97 to 2000-01 are summarized as follows:

<i>Program Graduates</i>	<i>1996-97</i>	<i>1997-98</i>	<i>1998-99</i>	<i>1999-00</i>	<i>2000-01</i>
SIAST Credential Programs (total)	3788	3744	3543	3474	3644

The report does not include the extension registrations in SIAST courses.

1.0 Introduction

SIAST is an educational institute that provides students with the opportunity to study full programs or a variety of courses, either at one of the four Institute campuses or at many locations throughout the province. Both the programs and courses are diverse in the method of delivery. Historical statistics provide SIAST management with the means to examine and compare trends in applications, enrollments and graduates.

2.0 Sources of Data

2.1. SIAST Education Equity Annual Monitoring Report

The primary source of data for the five-year summary report originates from the statistics produced by the SIAST student record system (BANNER) for the annual SIAST Education Equity Monitoring Reports. The focus of the annual monitoring reports is to review and summarize the application, enrollment, and graduation activity in terms of the four designated equity groups. The data for the five-year program summary herein is verified with that of the Education Equity Monitoring Report. The figures are slightly different from those of the SIAST Annual Report. Also, the graduate figures are different than those identified in the Graduate Employment Survey Report (GES). These differences are a consequence of the data for the Education Equity Monitoring Report, Graduate Employment Survey Report and the SIAST Annual Report being produced from BANNER at different points in time.

2.2. SIAST Program Inventory Report

In the five years, 1996-97 to 2000-01, there have been many approved program changes – new programs, revisions to existing programs, and deleted programs. The SIAST Program Inventory Report, March 2002, was used to update the elements of the SIAST programs.

2.3. Notes

Prior to 1997-98, programs were structured within divisions aligned with the campuses. For example, the four Welding programs at SIAST, one at each of the four campuses, were considered separate programs in different divisions with different management structures. During the period 1997-98 to 1998-99, SIAST was reorganized as a provincial educational institute and as a result programs were restructured into one of six program disciplines. The six program divisions are:

- | | |
|----------------------------|----------------------|
| ▪ Business and Agriculture | ▪ Community Services |
| ▪ Industrial Training | ▪ Nursing |
| ▪ Science and Health | ▪ Technology |

Two additional divisions were also established at that time:

- | | |
|----------------------|-------------------|
| ▪ Associated Studies | ▪ Basic Education |
|----------------------|-------------------|

The Associated Studies division assists programs in offering courses to students who are enrolled in full programs. Therefore course data is totalled with that of programs.

Since 1998-99, extension programs were absorbed within the main program divisions rather than separate divisions at each campus.

In this five-year summary report, programs and their data are aligned according to the current division placements. For example, the Electrician program, once categorized within a variety of divisions at the campuses, and more recently at the time of restructuring was aligned in the Industrial Training division, is now categorized in the Technology division.

With the programs now aligned in the current divisional structure, all data for transferred programs are now placed with the program in the new division.

3.0 Results

The Five-Year Summary report is produced annually. The report is a comprehensive picture of students registered in SIAST programs and this year has been expanded to include:

- a) Core Funded Programs
 - *applied certificate, certificate, advanced certificate, and diploma programs*
 - *on-campus programs*
 - *full-time and part-time programs*
- b) Non-Core Funded Programs
 - *applied certificate, certificate, advanced certificate, and diploma programs*
 - *off-campus programs [which include those offered in partnership with Regional Colleges or other agencies; distance delivery, SCN, and home-study]*
 - *full-time and part-time programs*
- f) Apprenticeship Programs
- d) Basic Education Programs
- e) Job Start/Future Skills Programs

The report does not include the tens of thousands of registrations or enrollments in extension courses or classes. It encompasses only those students enrolled in programs (i.e. those that have met the admission requirements for programs).

Appendix A outlines the complete SIAST program data for *capacities, applications, enrollments, and graduates*. A notes column has been added to the program data in the appendix which identifies major program revisions that have taken place within the past few years. For example, in 1998-99, the Department of Education re-titled many Basic Education programs. Another example is the Nursing Education Program of Saskatchewan, a partnership arrangement with the University of Saskatchewan, and the former diploma nursing programs. These and other re-configured, re-titled or revised programs have been captured in the notes section.

3.1. Capacities

The capacities data is established by the program divisions and provides the registration centers at the campuses with the maximum number of students to register for each program. The data below is provided by the Registrar's Office and applies only to the on-campus programs.

<i>SIAST Program Capacities</i>	<i>1996-97</i>	<i>1997-98</i>	<i>1998-99</i>	<i>1999-00</i>	<i>2000-01</i>
Business and Agriculture	978	950	960	972	975
Community Services	754	793	811	830	885
Industrial Training	582	604	596	596	574
Nursing	614	474	458	538	634
Science and Health	570	572	572	572	617
Technology	1235	1239	1234	1267	1336
SIAST On-campus Programs	4733	4632	4631	4775	5021

Full Load Equivalencies

In the years 1996-97 to 2000-01, capacities were recorded for core funded on-campus seats. For 2001-02 and onward, capacities will be recorded as full load equivalents (FLE) reflecting the total capacity of SIAST to delivery programs regardless of funding or delivery methods.

By way of explanation, the table below records the identified capacities for full load equivalents in 2001-02:

<i>SIAST Program Capacities</i>	<i>2001-02</i>			
	<i>Core Funded</i>	<i>Non-core Funded</i>	<i>Apprenticeship</i>	<i>Basic Education</i>
Business and Agriculture	1063			
Community Services	715			
Industrial Training	527			
Nursing	550			
Science and Health	592			
Technology	1270			
SIAST On-Campus Programs	4717	4035	2908	2493
Total = 14,153				

Non-credit course offered at SIAST are not included in the capacities calculations

3.2. Applications

Applications identified in a specific academic year (July to June) are not the same cohort as the enrollment figures in the same academic year. The application data identify those that applied to SIAST within the academic year. Generally, the applicants in one year will become the enrolled students in the following academic year. In cases where programs have wait lists, some applicants may not become enrolled students for the programs of choice for a few years.

Application data is not recorded in BANNER for the Apprenticeship and Basic Education programs. The Apprenticeship and Trade Certification Commission deals with applications for apprentices. If the Basic Education division at SIAST deems a student has met the standards for admission to Basic Education, formal application is not required. Students are directly enrolled in Basic Education as registered students.

Also, the majority of applications for off-campus programs are not entered in BANNER. For example, the Regional Colleges register the applicants to study SIAST programs at one of the nine colleges in the province. Therefore, the applications data from BANNER are mainly for those programs offered at the four SIAST campus locations.

As well, a student applying to study a diploma program will apply once at the beginning of year one, whereas, for those programs with two exit points, both certificate and diploma, students must re-apply to enter the diploma program. An example is the Early Childhood Education certificate and diploma programs.

Summarized application data for SIAST credit programs are as follows.

<i>SIAST Applications</i>	<i>1996-97</i>	<i>1997-98</i>	<i>1998-99</i>	<i>1999-00</i>	<i>2000-01</i>
Business and Agriculture	2284	2017	2211	1833	1670
Community Services	1689	1650	1904	1525	1584
Industrial Training	1531	1494	1667	1246	1194
Nursing	537	492	1085	1133	1048
Science and Health	1812	2061	1953	1269	1812
Technology	1409	1391	1651	1450	1486
SIAST On-Campus Credit Programs	9262	9105	10471	8456	8794

At first glance, one could conclude that applications had decreased overall in the years 1996-97 to 1999-00. However, one must be cognizant that in some divisions, for example Business and Agriculture, a large proportion of training is offered off-campus and won't be recorded in BANNER. Another division, Nursing, was in transition from the SIAST diploma nursing program to the NEPS program in the 1996-97 and 1997-98 years. This may have been a factor for the reduction in applications. As the NEPS program replaced the diploma nursing program and a nursing shortage in the province became evident, intake capacities were increased and applications increased dramatically.

3.3. Enrollments

Enrollment data include total student enrollments in all SIAST programs. The data include program enrollment for on- and off-campus, full- and part-time, core and non-core funded, Apprenticeship and Basic Education programs. Not included are individual course registrations.

Enrollments for all SIAST programs are recorded in BANNER. Total enrollments for each of the five years are higher than applications, since applications for Basic Education, Apprenticeship, and many off-campus programs, as mentioned above, are not recorded in BANNER.

SIAST enrollment in all programs for the period 1996-97 to 2000-01 is summarized as follows.

<i>SIAST Enrollment</i>	<i>1996-97</i>	<i>1997-98</i>	<i>1998-99</i>	<i>1999-00</i>	<i>2000-01</i>
Apprenticeship	2169	2597	2782	2883	2854
Basic Education	3674	2992	2882	2567	2493
Business and Agriculture	2139	2273	1842	1719	1723
Community Services	1143	1167	1029	1128	1132
Industrial Training	1229	1295	1091	1081	933
Nursing	629	546	580	766	864
Science and Health	1294	1487	1437	1292	1401
Technology	1309	1273	1195	1195	1327
SIAST Programs (total)	13586	13630	12838	12631	12727

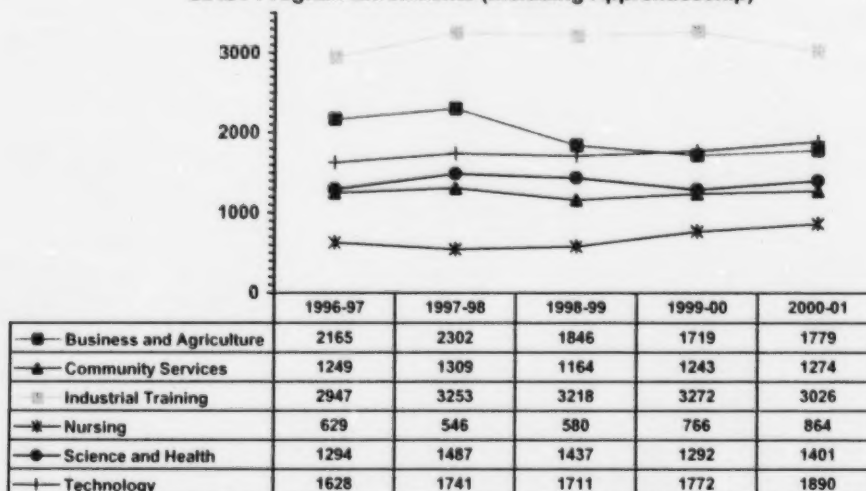

The overall enrollment at SIAST in the last five years has remained fairly stable, a difference of approximately 1000, from a high in 1997-98 of 13630 to 12631 in 1999-00. When one compares enrollment on an annual basis, the differences are much less. For example, between 1998-99 and 1999-00, enrollment decreased by 207, yet between 1999-00 and 2000-01, enrollment increased by 96.

Increases in enrollment occurred in five of the six program divisions over the five-year period. The suspension of the Medical Laboratory and Medical Radiologic programs in 1996-97, while the curriculum was under review, would have had an impact in the enrollment in the Science and Health division, from 1294 in 1996-97 to 1401 in 2000-01. Also, in the Nursing division, the increase in capacity in the NEPS and Practical Nursing programs is evident with enrollments increasing each year from 629 in 1996-97 to 864 in 2000-01.

In the Basic Education division, enrollment decreased by 1181 in the 1996-97 to 2000-01 comparison. In fact, enrollment decreased in each of the last five years, with the larger decreases between 1996-97 and 1997-98 (682), and 1998-99 and 1999-00 (315). Decreasing Federal funding and transferring more of the responsibility for training in Basic Education to the Dumont Technical Institute (DTI) are cited as major reasons for the overall decrease in Basic Education enrollment at SIAST.

The chart below provides a visual view of enrollment in the six program divisions over the five-year period. The enrollment figures include apprenticeship data.

SIAST Program Enrollments (including Apprenticeship)

3.4. Graduates

The data for graduates, as with applications, does not include the Basic Education nor Apprenticeship programs. Upon completion of study, students in the Apprenticeship programs receive journey person status from the Apprenticeship and Trade Certification Commission. Upon completion in the Basic Education programs, students receive graduation status from Saskatchewan Learning.

Summarized graduate data for SIAST credit programs are as follows.

Program Graduates	1996-97	1997-98	1998-99	1999-00	2000-01
Business and Agriculture	832	831	809	744	779
Community Services	557	708	537	655	607
Industrial Training	810	810	757	780	831
Nursing	303	104	93	142	114
Science and Health	859	900	972	825	893
Technology	427	391	375	328	420
SIAST Credential Programs (total)	3788	3744	3543	3474	3644

In the last three years, 1998-99 to 2000-01, the number of graduates at SIAST overall remained fairly stable with a difference of 101 between the two-year comparison 1998-99 and 2000-01.

Students in the NEPS program now graduate from the University of Saskatchewan, which accounts for the continuing decrease in graduates. Graduates between 1999-00 and 2000-01 had increased in the Business and Agriculture, Industrial Training, Science and Health, and Technology division and decreased in Community Services and Nursing divisions.

The table below summarizes the graduation rates by credential:

<i>Graduates by Credential</i>	<i>1996-97</i>	<i>1997-98</i>	<i>1998-99</i>	<i>1999-00</i>	<i>2000-01</i>
Applied Certificate	467	399	413	535	617
Certificate	2260	2358	2254	2069	2086
Advanced Certificate	46	99	82	147	112
Diploma	1015	888	794	723	829
SIAST Credential Programs (total)	3788	3744	3543	3474	3644

The number of graduates awarded applied certificates increased in each of the four years, 1997-98 to 2000-01. There are currently 37 applied certificate programs at SIAST, which is 20% of credit programs.

The number of graduates awarded advanced certificates also increased in the first four years under review (1996-97 to 1999-2000) with a slight decrease in 2000-01. There are currently 14 advanced certificate programs offered at SIAST, seven of these are in the Nursing division. Three others were established in the Community Services division when the Ceramist program was separated into four smaller programs; one certificate and three advanced certificate programs.

4.0 Review of Enrollment Figures

4.1. Credit Programs

Credit programs are those for which one of the following credentials is awarded upon completion of study: *applied certificate, certificate, advanced certificate and diploma*. Credentials from SIAST are not awarded for *Apprenticeship* nor *Basic Education* programs.

Summarized enrollment data for SIAST credit programs are as follows. **Appendix A** reports the detailed application, enrollment and graduate information for each SIAST credit and apprenticeship program.

<i>SIAST Enrollment – Credit Programs</i>	<i>1996-97</i>	<i>1997-98</i>	<i>1998-99</i>	<i>1999-00</i>	<i>2000-01</i>
Business and Agriculture	2139	2273	1842	1719	1723
Community Services	1143	1167	1029	1128	1132
Industrial Training	1229	1295	1091	1081	933
Nursing	629	546	580	766	864
Science and Health	1294	1487	1437	1292	1401
Technology	1309	1273	1195	1195	1327
SIAST Credit Programs (total)	7743	8041	7174	7181	7380

Enrollment in the following divisions increased in 2000-01 from 1999-00; Business and Agriculture, Community Services, Science and Health, Technology, as well overall at SIAST.

4.2. Core and Non-core Funded Programs

SIAST core funded programs are directly funded within the SIAST operating budget. Core funded programs are generally offered on-campus.

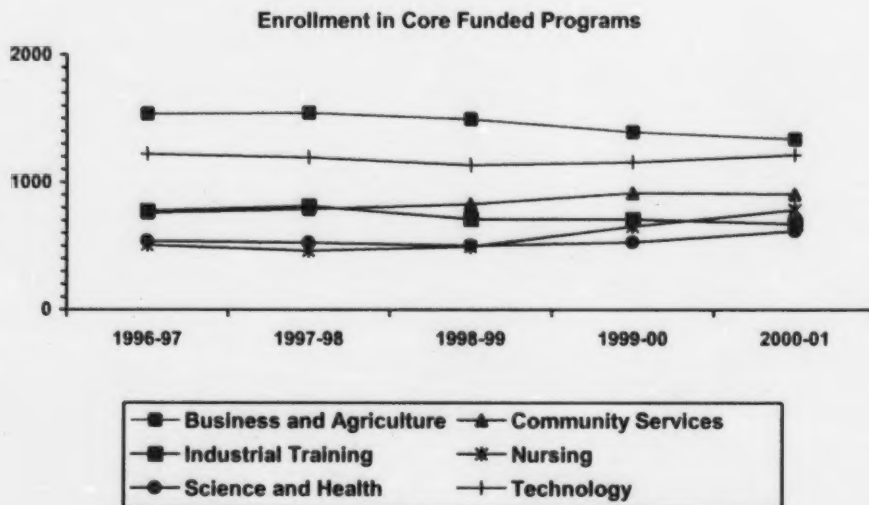

Non-core funded programs are those mainly offered off-campus in partnership arrangements with the Regional Colleges or other education institute or agency. The non-core funded programs are offered on demand and may not necessarily be offered every year.

Core Funded Programs

SIAST Enrollment	1996-97	1997-98	1998-99	1999-00	2000-01
Business and Agriculture	1537	1544	1493	1393	1337
Community Services	760	790	827	916	907
Industrial Training	774	815	711	709	673
Nursing	508	464	496	652	783
Science and Health	541	526	502	528	616
Technology	1222	1194	1134	1157	1212
Core Funded Programs (total)	5342	5333	5163	5355	5528

There are slight reductions in enrollments in the Business and Agriculture, Community Services and Industrial Training divisions. The reduction in Business and Agriculture may be attributed to the slump in the agriculture sector.

The chart below graphs the five-year trend of core funded enrollment in each division. The data is shown in the previous table.

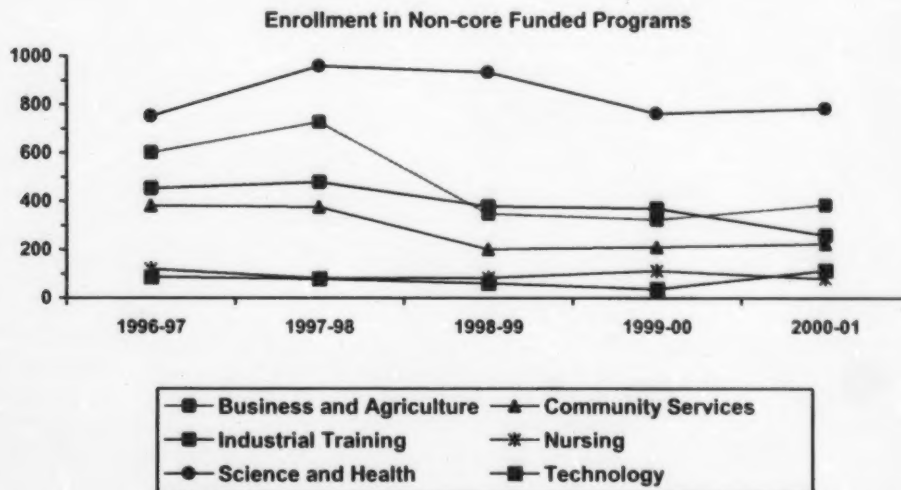

Non-core Funded Programs

SIAST Enrollment	1996-97	1997-98	1998-99	1999-00	2000-01
Business and Agriculture	602	729	349	326	386
Community Services	383	377	202	212	225
Industrial Training	455	480	380	372	260
Nursing	121	82	84	114	81
Science and Health	753	961	935	764	785
Technology	87	79	61	38	115
Non-core Funded Programs (total)	2402	2708	2011	1826	1852

Enrollment in 2000-01 increased in the Business and Agriculture, Community Services, Science and Health, and Technology divisions.

The chart below graphs the five-year trend of enrollment in each division. The data is shown in the previous table.

4.3. JobStart/Future Skills Enrollments

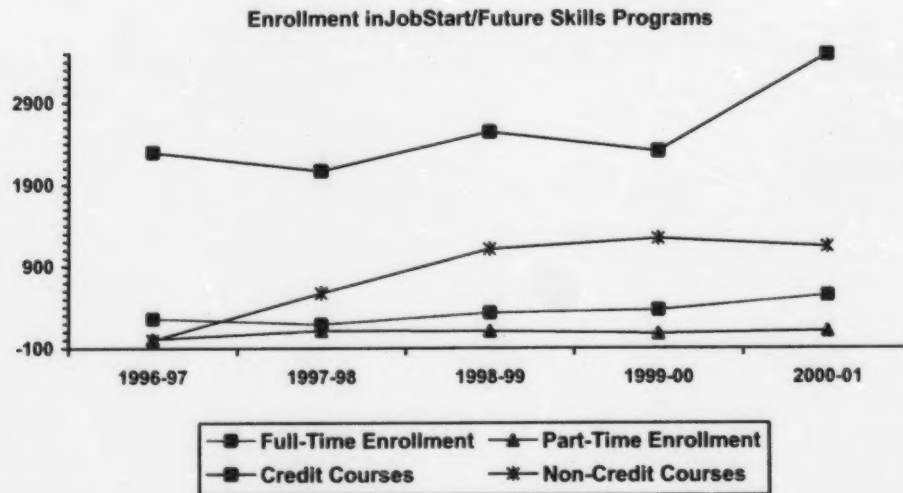

Enrollment data for JobStart/Future Skills programs are not totalled with SIAST regular program data. The JobStart/Future Skills program is a provincial government initiative that provides financial assistance to employers and training institutions to deliver recognized training that aids in the creation of new employment opportunities and meets the immediate needs of industry. The components of the JobStart/Future Skills initiative include both work-based and classroom training.

Summarized enrollment data for the JobStart/Future Skills programs are as follows:

JobStart/Future Skills Enrollment:	1996-97	1997-98	1998-99	1999-00	2000-01
Full-Time	264	193	332	366	546
Part-Time	15	116	109	81	112
Credit Courses	2292	2063	2537	2302	3479
Non-Credit Courses	-	575	1111	1239	1139

SIAST manages all registrations in JobStart/Future Skills programs for training throughout the province, whether credit or non-credit. The lengths of the credit courses are consistent with SIAST programs, whereas the lengths of the non-credit courses vary according to the needs of the employers.

The chart below graphs the five-year trend of enrollments in the JobStart/Future Skills programs.

This initiative continues to grow as shown by the increasing trend in enrollments, particularly in the credit courses. There may be some correlation between the decrease in program enrollments in non-core funded programs, in section 4.2 and the marked increase in enrollments in the JS/FS program. However, JS/FS training generally has replaced previously sponsored training or accesses new employers to SIAST who have not been clients in the past.

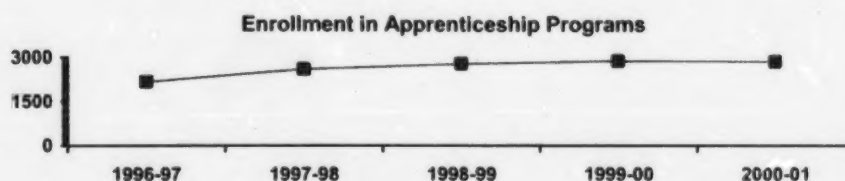

4.4. Apprenticeship Programs

SIAST currently offers twenty-seven Apprenticeship programs in four of the six program divisions – the majority of programs are located in the Industrial Training division. Enrollment in apprenticeship programs increased over the four-year period, 1996-97 to 1999-00. Enrollment decreased slightly in 2000-01 by 29 enrollments (1%).

Summarized enrollment data in the Apprenticeship Programs are as follows. **Appendix B** records the enrollment figures for apprenticeship programs offered at SIAST.

SIAST Enrollment	1996-97	1997-98	1998-99	1999-00	2000-01
Business and Agriculture	26	29	4	0	56
Community Services	106	142	135	115	142
Industrial Training	1718	1958	2127	2191	2093
Technology	319	468	516	577	563
Apprenticeship Programs (total)	2169	2597	2782	2883	2854

The chart below graphs the five-year trend of enrollments in the Apprenticeship programs. The actual figures are shown in the previous table.

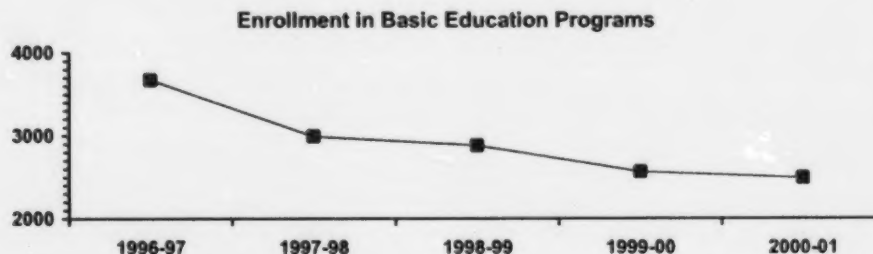

4.5. Basic Education Programs

SIAST offers eleven specific Basic Education programs at the four campuses. A few years ago Saskatchewan Learning combined a variety of smaller BE programs into larger groupings. The combinations have been identified in the notes column of the chart. The ABE 5-10 and Adult 12 programs are offered at each of the Kelsey, Palliser, Wascana and Woodland Campuses. The other nine programs are offered at one, two or three of the SIAST campuses.

The Basic Education enrollment data are summarized as follows. **Appendix C** records the full enrollment figures for Basic Education programs.

BE Program Enrollment	1996-97	1997-98	1998-99	1999-00	2000-01
ABE 5-10	1014	823	872	864	863
ADULT 12	1209	1061	1000	846	862
Other BE programs	1451	1108	1010	857	768
Total BE Enrollment	3674	2992	2882	2567	2493

The chart below graphs the five-year trend of enrollment in Basic Education programs.

Overall, enrollment in Basic Education continues to decrease and can be attributed to the decrease in third party funding. The major Basic Education programs, ABE 5-10 and Adult 12, do not reflect the decrease as much as the program categorized within "other Basic Education programs". These are Employability/Life Skills, English Language, GED Preparation and Literacy.

5.0 Conclusion

The summary report is more comprehensive this year and it is anticipated that the document will be more beneficial to management and program staff. The report will continue to be produced annually and will now include the additional elements that were presented in this document:

- a) Core Funded Programs
 - *applied certificate, certificate, advanced certificate, and diploma programs*
 - *on-campus programs*
 - *full-time and part-time programs*
- b) Non-Core Funded Programs
 - *applied certificate, certificate, advanced certificate, and diploma programs*
 - *off-campus programs [which includes those offered in partnership with Regional Colleges or other agencies; distance delivery, SCN, and home-study]*
 - *full-time and part-time programs*
- c) Apprenticeship Programs
- d) Basic Education Programs
- e) Job Start/Future Skills Programs

The report identifies capacities, applications, enrollments and graduates for SIAST programs.

The data does not include the tens of thousands of extension registrations in SIAST courses.
